CHANGE PROPOSAL TITLE									
ADD NEW SYMBOL, ZONE OF RESPONSIBILITY (ZOR), RECTANGULAR									
SUGGESTED CHANGE									

The Fire Support community has a requirement to add a new symbol to MIL-STD-2525B.

- 1. The purpose of the Rectangular Zone of Responsibility symbol is to graphically display to commanders in the Common Operational Picture (COP)/Common Tactical Picture (CTP) an enclosed area of the battlefield that is controlled by a specific unit, from a fire support perspective.
- 2. Recommend adding to hierarchy item 2.X.4, Fire Support, under the "Areas", "Target Acquisition Zones" hierarchy, 2.X.4.3.3, figure B-17, and table B-IV.

OVERVIEW

Currently, the standard does not contain a symbol depicting rectangular Zones of Responsibility (ZOR). The purpose of the rectangular Zone of Responsibility symbol is to graphically display to commanders and operators the geometry used within the fire support system to designate an enclosed area of the battlefield that is controlled by a specific unit (from a fire support perspective), usually a Fire Support Element. Incorporation into MIL STD 2525B, which will be used in JMTK and GSD, will allow the symbols to be transmitted/received by all battlefield system. The rectangular Zone of Responsibility is a required symbol for use in the COP/CTP to be shared across the battlefield. The development of the COP/CTP is required of all ABCS component systems. Fire Support systems are the producer of rectangular Zone of Responsibility for the COP/CTP. Fire Support systems will retain this capability for fielding throughout the Army and USMC.

OPERATIONAL DESCRIPTION

In general, the purpose of the Zone of Responsibility symbol is used within the fire support system to designate an enclosed area of the battlefield that is controlled by a specific unit (from a fire support perspective), usually a maneuver Fire Support Element. Two (2) point locations and a width are required to graphically display a rectangular Zone of Responsibility. The minimum information required to interoperate with another is defined below.

IMPLEMENTATION

Description: Fire Support, Area, Zone of Responsibility, Rectangular

Parameters:

- 1. Anchor Points. This graphic requires two anchor points and a width, defined in meters, to define the boundary of the area. Points 1 and 2 will be located in the center of two opposing sides of the rectangle.
- 2. Size/Shape. Size: As determined by the anchor points. The anchor points determine the length of the rectangle. The width, defined in meters, will determine the width of the rectangle. Shape: Rectangle. The information fields should be moveable and scaleable.

3. Orientation. As determined by the anchor points.

Fixed/Dynamic: Dynamic

Hierarchy: 2.X.4.3.3.7.2

Symbol ID: G*F*AZZR--***X

DECISION NOTICE

SSMC 3-01: Approved as amended. MIL00-18A amended by adding text to point out that width will be defined in meters. See parameters and graphic example above and the example of Table B-IV in attachment A.

Tasks:

1. Modify Figure B-17 to reflect new hierarchy structure (Figure B-17 becomes Figures B-17.1 and B-17.2) and addition of new Fire Support graphics.

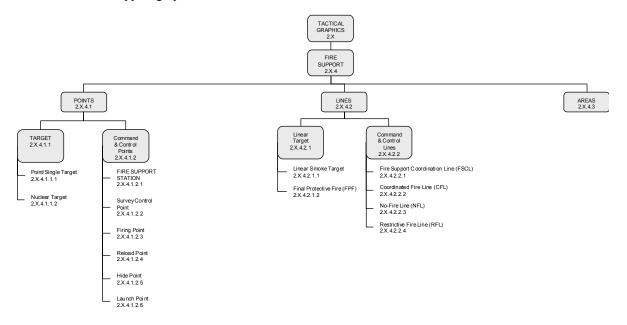

Figure B-17.1. Fire Support.

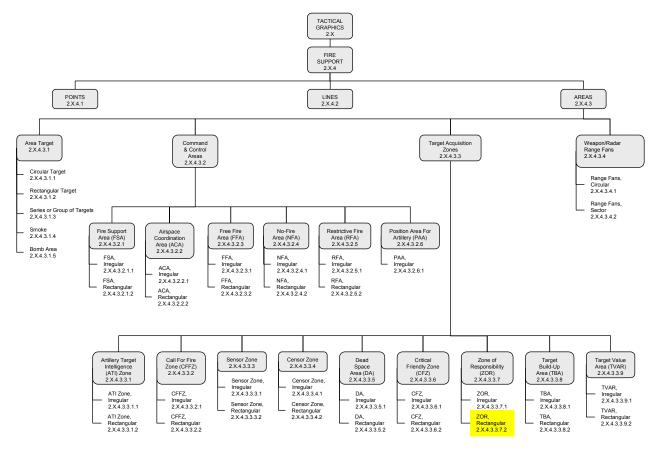

Figure B-17.2. Fire support.

2. Modify Table B-III to reflect restructured hierarchy numbers, provide new symbol IDs for restructured graphics and addition of new graphics' hierarchy numbers and symbol IDs.
